

Outdoor Lighting

As the dusk fades into darkness, extend the outdoor hours in your day through Satilla REMC's outdoor lighting packages.

Outdoor lighting provides:

Security – discouraging intruders, which brings you peace of mind.

Safety – reducing the likelihood of an accident caused by poor illumination.

Sparkle – enhancing the nighttime appearance of your home or business.

We install and maintain outdoor lighting for one low monthly fee with no worry.

Our experts can plan your lighting requirements, from a single security light to an entire shopping center. Contact your local Satilla office for more details.

Security Lighting

Our energy-efficient security lights bathe your property with peace of mind, protecting your family and business. Automatic photo controls (included) make sure the light's on at dusk and off at dawn. We can mount the fixture on existing poles or install a new pole to go along with either underground or overhead wiring.

Decorative Security Lighting

Satilla REMC's decorative security lighting is perfect for residential areas, walkways and shopping centers. The deluxe fixture, coupled with its fiberglass pole, adds security to areas with underground wiring while keeping aesthetics intact. Dusk to dawn operation is regulated by the fixture's on-board photo control.

Floodlighting (commercial only)

Need to turn night in to day? Our pole-mounted floods brighten buildings, material storage areas and facades like the sun. Use alone or in pairs to achieve the desired level of security. For example, a single 400 watt powerflood fixture provides 50,000 lumens of lighting power, every night, automatically. Installed with overhead or underground wiring.

Parking Lot Lighting (commercial only)

Brighten parking lots, parkways, tennis courts, malls or commercial/industrial complexes with our "shoe box" fixtures. Their neat, contemporary look says "business." They turn on and off automatically and can be installed in areas with underground wiring. Ask us about our free planning services.

Roadway Lighting (commercial only)

Our roadway lighting service saves lives and money. Roadway lighting is available in a variety of sizes and light patterns to fit any application, from major intersections to residential developments. Specially designed reflectors keep light on roads and out of adjacent buildings and windows. We can install street lighting packages in areas with overhead or underground wiring on wood or decorative fiberglass poles.
